Sunday quick card

Live RO2EN · Romanian ⇄ English captions, offline

BEFORE THE SERVICE

1. Open **Live RO2EN** 10 minutes early. Wait until the dial says **START**.
2. Check the three lights above the dial: **Sound**, **ProPresenter**, **Pace** are green.
3. Ask the sound desk to bring the mixer send up; the meter should sit in the green **GOOD** band while someone speaks.
4. Guest speaker or unusual names? Press **T** and type them, one per line.
5. Optional: **Rehearsal** plays a recording through to the big screen.

START AND STOP

Space	Start captions (or click the dial).
Space **Space**	Stop: press twice, or hold the dial.

Something wrong on screen? Press H. Captions hide at once; press H again to show them.

DURING THE SERVICE

H	Hide or show captions
Esc	Blank the big screen until the next phrase
Backspace	Remove the last caption
E	Fix the last caption
T	Today's names & words
1 **2** **3**	Speaker: Auto-detect / Romanian / English
Q	Quality: Quickest or Best
R	Reconnect to ProPresenter

AFTER THE SERVICE

1. Stop with **Space** **Space**.
2. Click **After** in the toolbar. Rate how it went (1–5) and tick what was off. This helps tune it.
3. Want the text? **Export** saves it to the Desktop (txt, subtitles or Word).
4. Leave the app open, or quit it. Nothing else to do.

IF A COLOURED BAR APPEARS ABOVE THE DIAL

It says what is wrong. Press its button first; it does the right thing.

No sound is coming in	Check the cable and that the mixer send is up. The meter moves again once sound arrives.
Can't reach ProPresenter	Captions still show in the app. In ProPresenter: Settings → Network → Enable Network. Then press **Try again**.
Captions running behind	They catch up by themselves. Press **Switch to Quickest** if it keeps happening.
The translator stopped	Press **Start again**.
macOS is asking about the microphone	Choose **Allow** in that question; it may be behind the app's window.
Microphone not allowed	System Settings → Privacy & Security → Microphone → turn on **Live RO2EN**.
Anything else	Open **Help** in the app. **Copy diagnostics** there saves a file to send to whoever looks after the app.

Everything runs on this Mac; no internet is needed during the service. Settings (sound input, ProPresenter, usual language) are in the app under **Settings**.
